A Faramé é uma empresa portuguesa com 30 anos de existência que pertence ao grupo francês Phoenix e se dedica ao desenvolvimento, fabrico e comercialização dos mais variados produtos metálicos de utilização na grande distribuição e logística.

Fundada em 1983 no concelho de Sintra, a Faramé possui uma unidade fabril com cerca de 8 mil metros quadrados de área coberta, de um total de 20 mil, empregando mais de 130 colaboradores altamente experientes e qualificados.

Apostando em elevados padrões a Faramé logrou obter, ainda durante os anos 90, diversas certificações que reflectem os sistemas de gestão integrada para a qualidade e ambiente que foram sendo implementados (ISO 9001, ISO 14001 e OHSAS 18001).

Hoje em dia a actividade da empresa está focada principalmente nos seguintes grandes grupos: Carros de Compras, Rolls, Contentores, Bases, Expositores, Indústria Vitivinícola, Serviço Postal e Indústria Automóvel. Além dos seus produtos standard a Faramé desenvolve ainda projectos de produtos específicos em resposta a solicitações dos seus clientes.

A Faramé dispõe de dois departamentos comerciais, um exclusivamente para o seu maior mercado, o de exportação, e outro para o mercado ibérico. O objectivo de ter a melhor proximidade possível com os nossos clientes é continuada pelo departamento de desenvolvimento na obtenção das melhores soluções a cada novo desafio e na constante melhoria das nossas propostas standard. Desde a sua criação a Faramé procurou dispor das mais avançadas tecnologias para a indústria metalomecânica e particularmente para o trabalho com arame. Hoje, a empresa possui diversos tipos de maquinaria automatizada e células robotizadas de soldadura por resistência eléctrica ou por MIG-MAG.

Um dos factores mais importantes para garantir um produto metálico de qualidade é ter uma boa protecção superficial que proteja contra a corrosão mas também que confira um aspecto visual agradável. Por essa razão, a Faramé dispõe de uma linha de pintura completamente automática e de duas sofisticadas linhas de zincagem electrolítica que permitem três tipos diferentes de passivação (azul, amarela e verde) e opcionalmente uma camada final de selante.

A Faramé faz dos seus trinta anos de experiência a base sólida a partir da qual procura constantemente inovar, com novos produtos e soluções, sempre acompanhados pelos clientes que anos após anos reafirmam a sua confiança.

Fondée en 1983 à côte de Lisbonne, FARAMÉ est membre du groupe français PHOENIX. FARAMÉ est spécialisée dans le développement, la production et la vente d'un large éventail de produits métalliques utilisés principalement dans la distribution et la logistique.

FARAMÉ possède un atelier de 8000m<sup>2</sup> et emploie 130 salariés qualifiés.

FARAMÉ s'est engagé dans le management de la qualité et de l'environnement en obtenant les certifications (ISO 9001, ISO 14001 et OHSAS 18001).

Aujourd'hui, ses principales activités sont : les chariots de supermarchés, les rolls, les conteneurs, les bases roulantes, les rayonnages et développe des productions spécifiques suivant les demandes de ses clients.

FARAMÉ possède deux départements commerciaux, le premier pour les grandes exportations et le second sur la péninsule ibérique. Le département développement a pour objectif d'assurer des contacts au plus proche de ses clients afin d'obtenir les meilleures solutions à chaque nouveau challenge et de constamment améliorer notre service.

Depuis sa création, FARAMÉ investi dans les technologies les plus avancées pour le travail du métal et plus particulièrement pour le travail du fil. Aujourd'hui, l'usine est pourvue de multiple machines automatisées et de cellules robotisées pour la soudure par résistance et la soudure MIG-MAG.

Un facteur primordial pour assurer la longévité d'un produit en métal est le traitement de surface, celui-ci doit garantir la protection contre la corrosion mais aussi assurer l'esthétique du produit. C'est pourquoi, FARAMÉ s'est dotée d'une ligne de peinture entièrement automatique ainsi que de deux lignes d'électrozingage proposant trois types de passivation (Bleue, Jaune, Verte) et la possibilité d'appliquer un vernis de finition. FARAMÉ utilise ses 30 ans d'expérience comme une solide base de départ pour innover et développer de nouveaux produits, ses clients historiques lui sont fidèles année après année.

Faramé is a Portuguese company with 30 years of existence, which belongs to the French group Phoenix and is dedicated to the development, production and sales of several kinds of metallic articles for use in distribution and logistics.

Founded in 1983 in Sintra, Faramé owns a factory with about 8000m<sup>2</sup> of covered area and employs more than 130 highly qualified and experienced employees.

Betting on high standards Faramé could achieve, during the 90s, several certifications that reflect management systems for quality and environment that were being implemented (ISO 9001, ISO 14001 and OHSAS 18001).

Nowadays products are mainly focused on Shopping Trolleys, Rolls, Containers, Bases, Displays. In addition to its standard articles Faramé also develops projects for specific products in response to requests from its customers.

Faramé has two commercial departments, one exclusively for its largest market, export, and another for the Iberian market (Portugal and Spain). The development department continues the purpose of having the best possible proximity with our customers, obtaining the best solutions to each new challenge and constantly improving our standard products.

Since its creation Faramé have sought the most advanced technologies for the metalworking industry and particularly to work with wire. Today, the company has several types of automated machinery and robotic welding cells to well by electric-resistance or MIG-MAG.

One of the most important factors to ensure the quality of a metallic product is to have a good surface protection against corrosion but which provides also a nice aesthetic. Therefore, Faramé has a completely automatic painting line and two highly sophisticated electrolytic zinc-coating lines, enabling three different types of passivation (blue, yellow and green) and optionally a final layer of sealer.

Faramé uses its thirty years of experience as a solid ground from where it constantly seeks innovation by developing new products and presenting better solutions, always accompanied with its customers from year to year.

A Faramé dispõe de uma abrangente oferta de Carros de Supermercado e robustos Carros de Mercadorias, passando por diversos outros produtos, com maior ou menor especificidade. Desenvolvidos com particular atenção às questões da segurança, ergonomia e durabilidade, trabalhamos para que os nossos produtos apresentem elevados níveis de qualidade, inovando para encontrar as melhores soluções e oferecer um design ímpar.

*Faramé propose une large gamme de Chariots des Supermarché et pour des Charges Lourdes tels que la construction, le bricolage, le jardinage et la décoration. Développé avec une attention particulière à la sécurité, l'ergonomie et la résistance, Faramé travaille pour des produits de haute qualité, innovants et toujours à la recherche des meilleures solutions avec un design raffiné.*

*Faramé offers a large range of Shopping Trolleys, from Supermarket ones to heavy load Carts, including many other products designed specifically to different shops such as construction, bricolage, gardening and decoration. Developed with particular attention to issues like safety, ergonomics and resistance, Faramé works to ensure its products have high quality standards, innovating to find the best solutions and to offer a distinct design.*

Com uma infinidade de aplicações, os Contentores são utilizados especialmente para fins logísticos, desde o armazenamento ao transporte, passando pela exposição de produtos. De entre os nossos produtos standard destacam-se os Contentores Porta-Paletes, os Contentores Rebativeis e os Contentores Gôndola. Maioritariamente produzidos em arame, estes Contentores oferecem uma excelente robustez e capacidade de carga, elevada funcionalidade, optimização de espaço e fácil monitorização visual das mercadorias.

*Avec une infinité d'applications, les Conteneurs sont utilisés surtout à des fins logistiques pour le stockage, le transport ou encore l'exposition des marchandises. Parmi nos produits standard, il est important de mentionner des Rehaus, des Conteneurs Pliables ou des Conteneurs Gondole. Essentiellement produit en fil, ces conteneurs offrent une excellente capacité de charge et robustesse, haute fonctionnalité, optimisation de l'espace de stockage et le contrôle visuel des marchandises.*

*With infinity of applications, Containers are used especially for logistic purposes as storage, transportation or goods display. Among our standard products it's important to mention the Pallet Converter, the Cage Containers and the "Box or Basket" type Containers. Mostly produced with wire, these containers provide excellent robustness and load capacities, high functionality, optimizations of storage space and visual control of goods.*

INDUSTRIE DES VINS | WINE INDUSTRY

Há mais de uma década que a Faram desenvolve contentores especificamente para garrafas de vinho e champagne. Entre as soluções propostas existem Contentores Rebativeis que permitem otimizar o espaço de armazenamento e transporte em vazio, Contentores com protecção anti-corrosão extra-resistente ou Contentores que permitem variar a sua posição em 90° com a ajuda de um Volteador.

*Depuis plus d'une décennie Faram développe des Conteneurs spécialement pour les bouteilles de vin et champagne. Parmi nos solutions, nous proposons des Conteneurs Pliants qui permettent l'optimisation du stockage et du transport en vide, Conteneurs résistants avec protection anti-corrosion, ou qui permettent de faire tourner sa position de filage 90 °.*

*For more than a decade Faram develops containers specifically for bottles of wine and champagne. Among our solutions we propose containers that allow the optimization of storage and space transport, high levels of zinc coating protection against corrosion or even Containers that allow to vary its position spinning 90° with the help of a Whirling Device.*

# SERVIÇO POSTAL

SERVICE POSTAL| POSTAL SERVICES

Com mais de duas décadas de experiência no desenvolvimento de equipamentos para o Serviço Postal, a Farama orgulha-se de ter entre os seus clientes muitas das principais empresas europeias deste sector, como a La Poste, Die Post, Chronopost, TNT e CTT. Dando grande atenção aos factores da segurança, ergonomia e funcionalidade, fazemos o desenvolvimento de produtos de raiz ou partindo de modelos pré-concebidos. Seja para a concepção e fabrico de um Roll, Carro ou Expositor, os nossos clientes sabem que os seus desafios serão trabalhados pela Farama até à melhor solução.

*Avec plus de deux décennies d'expérience dans le développement d'équipements pour le Service Postal, Farama est fière de compter parmi ses clients bon nombre des meilleures entreprises européennes de ce secteur, comme La Poste, Die Post, Chronopost, TNT ou CTT. Accordant une attention particulière à la sécurité, l'ergonomie et la fonctionnalité, nous développons des produits à la page blanche ou à partir de concepts pré-établis. Dans la conception et la production d'un Roll, Chariot ou Présentoir, nos clients savent que leurs problèmes seront travaillés par Farama jusqu'à la meilleure solution.*

*With more than two decades of experience in developing equipment for the Postal service, Farama is proud to have among its clients many of the top European companies in this sector, such as La Poste, Die Post, Chronopost, TNT or CTT. Giving great attention to safety, ergonomics and functionality, we develop products from a blank page or starting from pre-designed concepts. In the design and production of a Roll, Car or Display, our clients know that their challenges will be worked by Farama until the best solution as been achieved.*
